Mohd Khalid

Node JS Developer

PROFESSIONAL SUMMARY

Dynamic backend developer proficient in Node.js, JavaScript, and RESTful APIs. Skilled in collaborating with cross-functional teams, designing and maintaining high-quality server-side applications. Strong problem-solving abilities and a passion for optimizing code and system performance.

PROJECTS

1. Wonderwave Travel Service | 🌐 | 🐙

HTML5 | CSS3 | JavaScript

- Built a responsive website using HTML5, CSS3, and JavaScript.
- Implemented functionalities such as sorting, filtering, pagination, and searching.
- Created an admin dashboard with CRUD (Create, Read, Update, Delete) features.
- Utilized JSON Server for a mock API to simulate server interactions.
- Employed Git for version control to track and manage code changes.

2. Vestal Trouble | 🌐 | 🐙

HTML5 | CSS3

- Developed a responsive website using HTML and CSS.
- Conducted picture-perfect cloning based on Figma designs.
- Utilized Git for version control to track project changes.

3. Tracker Jet | 🌐 | 🐙

HTML5 | CSS3 | JavaScript | Nodejs | MongoDB

- Designed and developed a study tracking website using HTML, CSS, and JavaScript for the frontend
- Utilized Node.js and Express.js for backend development with MongoDB as the database
- Implemented CRUD operations for seamless data management
- Developed a discussion forum allowing users to ask questions and engage in discussions
- Implemented search, sort, and pagination features for enhanced user experience
- Led the design and implementation of the discussion forum, contributing to both frontend and backend development
